Learning Outcomes

- Apply learning through experiences in local, global, international, and intercultural problem solving while traveling and studying abroad or through global and internationally focused local service learning or internship projects.
- Develop global awareness through knowledge-building of the interrelatedness of local, global, international, and intercultural issues, trends, and systems
- Demonstrate how to think across disciplinary boundaries

General Education Outcomes Supported

- Students develop higher order thinking skills. Students must be able to apply, analyze, synthesize, and evaluate what they learn.
- Students gain greater awareness of cultural perspectives.
- Students can write clear, coherent, well-organized documents, which are substantially free of errors.
- Students demonstrate information literacy.

Standard Practices

Learning activities

- Structured study abroad or global and internationally focused experiential learning project.
- The course content is interdisciplinary, and allows students to investigate the links among the social sciences, STEM, the arts, and the humanities. This course provides a structured global study experience.

Assessments

- Experiential Learning Self Evaluation assessments through pre and post experience exams, journal, or reflections essays. Individual or group study abroad or international, globally focused research, skill, or service project that fosters a greater awareness of cultural perspective and civic engagement.

Last Revision Date: Spring 2022
