LEARNING OUTCOMES

1. Conduct head-to-toe holistic nursing assessments on a diverse adult patient population with

the recognition of 'normal' physical, behavioral, psychological and spiritual health status.

2. Identify basic patient needs and prioritize utilizing various nursing theories such as Maslow's Hierarchy of Needs, to plan care and provide nursing interventions that reflect knowledge of human growth and development, age-appropriate adult nursing care, and application of fundamental nursing principles.
3. Develop clinical reasoning and nursing judgment to make responsible patient-centered care decisions at the fundamental level to ensure patient safety.
4. Recognize and apply national standards and guidelines in nursing practice provided at various healthcare systems, including but not limited to the National Patient Safety Goals, the Nursing Scope and Standards of Practice, and the Arkansas Nurse Practice Act.
5. Develop listening and communication skills to effectively promote teamwork and conflict resolution with members of the healthcare team and to promote advocacy and a therapeutic relationship with patients.
6. Demonstrate accountability and responsibility for culturally-appropriate nursing care provided at the fundamental level while maintaining ethical and legal principles.
7. Apply theoretical knowledge of fundamental nursing concepts in the provision of adult and geriatric patient care.
8. Demonstrates professionalism at all times in the clinical setting.
